

Sustainable Dormitory Sleep

Varsity Green is part of a seamless system for the responsible removal and replacement of dormitory mattresses. As part of North American Mattress Upcycling (NAMU), we disrupt the environmentally harmful practices that characterize the disposal of approximately 20 million mattresses per year.

## *Integrated Removal & Replacement*

Instead of burdening landfills with bulky, toxic mattress waste materials, we instead use state-of-the-art health, safety and environmental practices to create an upcycled mattress.

**This seamless coordination creates a virtuous circle.**

We save more than 90 percent of bedding materials from ever reaching landfills while providing an affordable, comfortable, high-quality product that is a cost-efficient option for you and an environmentally responsible choice for your students.

## *What We Do*

- 1 Remove and transport existing mattresses
- 2 Use state-of-the-art health, safety, and environmental practices to create high-quality, comfortable, and affordable replacement mattresses
- 3 Deliver and install replacement mattresses that are the most environmentally responsible choice for you and your students
- 4 For an additional fee, we report back to the institution the volume of material saved from landfills, using the fully transparent framework established by the Sustainable Accounting Standards Board (SASB).

**By purchasing Varsity Green, you are assured that you're using the most environmentally sustainable, cost-effective system for mattress removal while supporting the supply of high-quality, reasonably priced mattresses for your dormitories.**

## *The Collegiate Line*

### **Specifications:**

- Premium Height-9 inches
- 50% Thicker than Standard Dorm Mattresses
- Innerspring or Densified Fiber Support System
- Tape Edged or Inverted Seam Zipper Cover
- Performance Cover: 210 denier polyurethane coated nylon
- Cover Benefits: anti-fungal, antibacterial, antistatic, anti-allergen, odor resistant, PVC free, durable, pliable, repels all liquids, resists abrasion, rips, tears
- Bed Bug proof
- 16 CFR 1633 Certified-meets federal and state flammability codes without spray-on FR chemicals
- Navy Blue
- 6 Year, Non-Prorated Warranty
- Quick turnaround and quick ship programs available
